

DX Express: Fuel Surcharge on DX Courier & DX Secure Services

Read about our fuel surcharge background, policy and current ruling price.

Background

- Diesel prices represent a highly significant element of our overall cost base.
- We seek to offset cost increases through improved efficiencies, however, they are such that they must be passed to our customers as a fuel surcharge
- In establishing this fuel surcharge, we seek to be:
 - Comparable with our competitors and market practise
 - Clear and consistent: surcharges are based on average prices published by the AA
 - Fair and honest: surcharges go up and down in line with published prices

Current ruling price for Fuel Surcharges

Date	UK Diesel pence per litre*		ROI Diesel cent per litre*	
	Excl. VAT	Incl. VAT	Excl. VAT	Incl. VAT
September 2021	114.08	136.9	119.59	147.1
